## POCUS: A Wonder of Medicine Continuing to Reshape Healthcare in Our World

"The Wonders of the World—lists compiling the world's most spectacular natural and man-made phenomena. These compilations denote the magnificent and grandeur of the human mind. They hold evidence that nature alone isn't responsible for changing the very fabric and heartbeat of our universe. Humanity has all ability to leave its mark on the world, enhancing its beauty and transforming it for good.

Medicine has seen its share of great wonders. Medical history constantly points to the innovations and advancements that sustain, support, bring, and give life. There is no more glorious amazement sweeping the world of yesterday, today, and tomorrow than that which allows the human heart to continue on. The medical field has given its share of awe-inspiring wonders and will proceed in doing so until the end of time."
