Point-of-Care Ultrasound
Certification Academy™

POCUS Post

June 18, 2020

Be part of the POCUS25 movement
to improve global health.

Make Your Voice Heard!

Have you taken the POCUS25 survey yet? POCUS25 is a community-led research study designed to bring scientific validity and evidence-based practice to help define the point-of-care ultrasound movement. With your help, we can define the standards and refine this list into a roadmap for the future of POCUS in healthcare.

Through the POCUS25 survey, we hope to...

1. facilitate a global standard for POCUS to ensure proficient use,
2. bring clarity to the scope of the core practices globally,
3. provide guidance for education and training, and
4. improve global health through better access to ultrasound practices.

Let your voice be heard! Take the 10-minute POCUS25 survey and contribute to the POCUS community today!

Know other colleagues using POCUS? Forward our POCUS Post Newsletter and ask them to complete the survey.
