## Building a Future of Better Care with POCUS Fundamentals

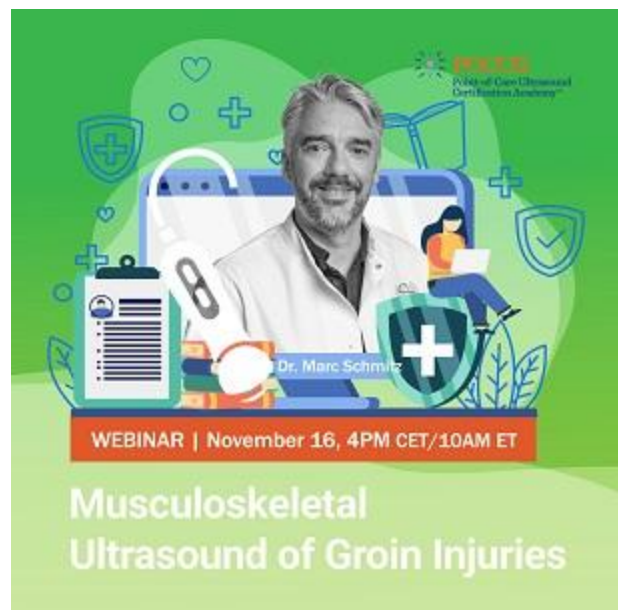

"Point-of-care ultrasound (POCUS) is an integral part of healthcare, with its benefits expanding beyond its traditional role in imaging and radiology. This modality elevates the standard of care around the globe by serving as a vital resource that supports medical workers and patients.

As awareness of its benefits across specialties grows, medical workers are increasingly adding POCUS to their toolboxes. No matter where they are in their ultrasound journey, these professionals embrace the opportunity to further their POCUS skill set and utilize it in their work. The experiences of the following healthcare community members and many others demonstrate how POCUS creates a global impact across specialties: nurses, medical students, and emergency medicine professionals"

### Keep Reading

In this 1-minute video, learn how POCUS can be used to screen for abdominal aortic aneurysm (AAA).
