POCUS Provides Timely Care for Patients Facing Lung Infections

"Point-of-care ultrasound (POCUS) provides healthcare professionals direct and immediate diagnostic insights that support their ability to provide the timely care that their patients need. This modality allows healthcare professionals to collect important diagnostic information at the point of care. In turn, medical workers can further streamline the direction of care and provide information to their patients sooner. As a portable, affordable tool, POCUS has elevated patient care in urban and rural settings globally."
